

SOLAR FILM EDITING STATION

The Solar Editing Station offers two bulk film carriers loading to standard 3" open spools for up to 2000 ft of thin film or 1000 ft of standard film. Full speed and direction control is provided to two powerful DC motors via a desk mounted controller.

For added safety winding is automatically stopped when the controller is released.

Options	Specifications
Inspection Light Panel	Table Dimensions
Illuminates the film for inspection	W1400 D800 H270 mm
