

SOLAR FILM LOADING STATION

The Solar Film Loading Station accepts open spools up to 380mm diameter. Film may be loaded to standard open spools and 3M type cartridges.

Four standard configurations offer manual and motorised options in a vertical or horizontal layout as shown below.

Layout	Left Spool	Right Spool
Vertical	Manual	Motorised
Vertical	Manual	Manual
Vertical	Motorised	Motorised
Horizontal	Motorised	Motorised

Options

3M Cartridge loading (vertical only)
Inspection light panel

Motorised options are controlled through a desk mounted variable speed control complete with a directional reverse switch. Safety features include automatic stop when control is released.
