

# SOLAR COPYMASTER

- FULL COLOUR
- HIGH RESOLUTION
- INTEGRATED COMPUTER

The Solar CopyMaster is a sophisticated yet easy to use overhead copier for copying books and documents the way you read them; face up. And just like the human eye it automatically focuses on the subject.

For those who wish to print or copy to another computer on the same network or output to digital storage such as CD or a USB device then the CopyMaster provides familiar tools to do so.

Inside the CopyMaster is a high specification computer with which the user interacts via the customary flat screen monitor, keyboard and mouse. In fact the CopyMaster can easily double as a normal computer for everyday computing tasks.

The CopyMaster adjusts automatically to the light conditions so the optional attachable lights are seldom required. Other options include book cradles for added support and kiosk style software for those users less familiar with computers or for additional computer security.

Also available without integrated computer and monitor.
